

Activity 2: Software

Identify all the input and output devices that you have used to complete your work so far.

- Input keyboard and Mouse

Name the operating system you are using.

- Windows

Name the software program(s) you use most often and why you use them?

- Google docs
- Word document
- Google slides
- I use these for software programs the most because this is what I use to complete my homework and assignments

Name the icon you use on your graphical user interface the least. Explain why you rarely use it.

- The icon I use the least is skype because i could use other apps to use to have better quality and quicker connection

Are you connected by a network? Do you know who your network provider is and what tools (hardware and software) you use to connect to your network?

- I am connected to the network because if I wasn't I wouldn't be able to do this activity.
- The network I use at home is Rogers.
- I have a modem and a router to connect to the network

Name the features of your workstation environment that you feel are effective or positive.

- I feel that having no distractions around is going to make you more productive and it is going to be more effective

Identify what should be changed to improve your workstation.

- I would like to change having entertainment on my screen while doing my work.
